Note: (1) All match ammo uses match bullets. These components have been selected and tested for 50 yard performance.

(2) Specifications may change without notice. Based on component availability and reliability.

(3) New Ammo, means new brass cases are used. There is no exchange price for these items. A credit will be issued for brass returned.

(4) TMJ bullets are NOT match grade, but the powder, charge weight, and primers are the same used in the match ammo.

*Distinguished Revolver Ammo.

**Due to the volatility in the price of precious metals and energy, we have been forced to incorporate a "price adder" to compensate for these escalating costs.
